Alex Sindalovsky

VP R&D | Hands-on CTO | AI Agents & LLM Systems

Hod HaSharon, Israel | +972-58-449-1356 | alex@acedzn.com | linkedin.com/in/alexsindalovsky | acedzn.dev

PROFESSIONAL SUMMARY

Hands-on R&D leader with 20+ years in software engineering and 10+ years leading development teams. VP R&D at TinyTap, leading GoEddy, the company's flagship AI tutoring product, end to end, and driving AI adoption across all ~50 employees. Still writes production code daily: AI agents, MCP servers, voice and avatar agents, and full-stack TypeScript / Next.js platforms. Founded and solo-built Workbook, an agent-first EdTech platform with ~1,100 lesson modules and paid subscriptions.

SKILLS

Leadership: R&D Leadership, Engineering Management, Technical Strategy & Roadmaps, AI Transformation & Adoption, 0-to-1 Product Development, Team Building, Cross-functional Collaboration, Stakeholder Management

AI & Agents: Generative AI, LLM Applications, AI Agents, Multi-Agent Systems, Agentic Workflows, MCP (Model Context Protocol), Agent Skills & Plugins, Prompt Engineering, Voice Agents, AI Avatars, AI Discoverability (llms.txt)

AI Platforms: OpenAI GPT, Anthropic Claude, Google Gemini, xAI Grok, Vercel AI SDK, LangChain, ElevenLabs, HeyGen, D-ID, Fal.ai, Hugging Face

Engineering: TypeScript, JavaScript, React, Next.js, Node.js, Python, REST APIs, OpenAPI, Turborepo, Convex, MongoDB, Vercel, Clerk, Solidity / Web3, Git, CI/CD

PROFESSIONAL EXPERIENCE

TinyTap (GoEddy) | Israel | 08/2020 - Present
EdTech company behind a global educational game-creation platform and GoEddy, an AI tutoring product.

VP R&D | 05/2025 - Present

- Appointed the company's first VP R&D, a newly created role, while remaining Web Development Team Lead and a hands-on developer.
- Lead GoEddy, the company's flagship AI product, end to end: concept, architecture, roadmap and execution.
- Drove company-wide AI adoption: designed and built agentic team setups (skills, connectors and plugins) used by all ~50 employees across Design, Sales, Marketing, Development and Project Management.
- Build real-time AI agents across text (chatbots), voice (voice agents) and video (AI avatars), and integrate AI services for content and rich-media generation.
- Shipped AI content-creation tools used by hundreds of creators on TinyTap's game-creation platform.
- Built public MCP servers and AI-discoverability pipelines that let LLM assistants find TinyTap and GoEddy apps and recommend them to users.
- Run AI research and rapid prototyping to evaluate emerging technologies for the products and the company.

Web Development Team Lead (promoted from Senior Frontend Developer) | 08/2020 - Present

- Lead development of TinyTap's WebSale and WebCreator web platforms, balancing hands-on frontend work with team leadership, planning and delivery.
- Led the integration of generative AI into WebCreator, delivering AI tools that speed up content creation for game creators.

- Led the company's blockchain initiative: built the Publisher NFT Dashboard and delivered the $EDU token launch.
- Lead web development of GoEddy; grew the team and coordinated cross-platform projects.

Tech: TypeScript, React, Redux, Next.js, Node.js, Python, Vercel AI SDK, LangChain, MCP, OpenAI, Claude, Gemini, ElevenLabs, HeyGen, MongoDB, Solidity, Web3.js

Workbook (החוברת) | **Founder & Developer** (independent venture) | workbook.co.il | 12/2025 - Present

- Founded and single-handedly built an interactive study platform for Israeli middle-school students (grades 7-9), aligned with the Ministry of Education curriculum: product, curriculum architecture, code, content pipelines and launch.
- Delivered ~1,100 interactive lesson modules across Science, Math, Geography, History and English, with simulations, quizzes, chapter summaries and 800+ practice pages.
- Built AI generators for custom practice sheets (including from PDFs), English dictations and learning games such as crosswords, word searches and mazes.
- Architected the platform as agent-first: a public agent API with an OpenAPI spec, an MCP hub serving 23 tools across a network of apps, agent skills, and llms.txt.
- Launched free and paid subscription tiers for students, parents and schools.

Tech: Next.js, TypeScript, Turborepo, Vercel AI SDK, Vercel eve, Convex, Clerk, Google Gemini, OpenAI GPT, TypeSafe Jev

Wibbitz | **Senior Frontend Developer** | Tel Aviv | 05/2019 - 07/2020

- Built reusable React components for Wibbitz Studio, a large-scale online video editor for media publishers, shipping via CI/CD with product, design and BI teams.

Magisto | **Web Developer** | Ness Ziona | 07/2016 - 04/2019

- Developed Magisto's AngularJS video-creation web app from design to launch, plus React and AngularJS widgets embedded on third-party partner websites.
- Coordinated with overseas vendors and partners and prioritized web R&D work.

Initial Rewards | **Lead Frontend Developer** | Tel Aviv | 05/2014 - 06/2016

- Led a team of 4 developers and QA (planning, deadlines, releases) building the white-label loyalty platform, e-commerce shops and PHP back office.

Modlin Online Services | **Lead Frontend Developer** | Ramat Gan | 11/2011 - 04/2014

- Led a team of 6 developers and QA building websites, finance widgets and a Django-based multilingual social platform for financial-sector clients.

Earlier: AceDesigns, Founder & Web Developer, freelance web studio (2003-2024) | H.L.C. High Logic Computing, Lead Web Developer (2010-2011) | CreoScitex, UI Designer (2002-2003)

EDUCATION & CERTIFICATIONS

- Multi-Agent Systems (course)
- iOS (Swift) and Android (Java) App Development, HackerU (2014-2015)
- Hadassim High School, Photography & Video Editing major
